Information on Regulation (EU) 2025/40 on Packaging and Packaging Waste (PPWR)

Dear Sir or Madam,

with this letter, we would like to inform you about the current status of our review and assessment of Regulation (EU) 2025/40 on packaging and packaging waste (Packaging and Packaging Waste Regulation – PPWR).

The PPWR contains, among other things, requirements concerning packaging and packaging components, as well as their placing on the market. In the course of our business activities, we manufacture certain products that are packaged and place these products on the market. To the extent that the respective provisions of the PPWR apply to the packaging manufactured by us or placed on the market by us, we review and take into account the applicable requirements.

This applies in particular to the requirements set out in Articles 5 to 12 of the PPWR, in each case from the respective dates of application or entry into force specified therein. These requirements include, among others, provisions concerning substances in packaging, recyclability, recycled content, compostable packaging, packaging minimisation, reusable packaging, and labelling and information requirements.

Our current assessment is based on the information and documentation available to us at this time, in particular the information and supporting documentation provided by our suppliers. Where a final assessment of individual requirements is not yet possible, or where specific requirements will only become applicable at a later date, we will continue to review the relevant requirements in due course and incorporate them into our processes as applicable.

We are committed to meeting the requirements of the PPWR applicable to our products and packaging at the relevant times, insofar as these requirements apply to the respective packaging. A final assessment may depend, in particular, on the specific design of the packaging, the materials used, the supporting documentation available for these materials, and the legal and technical requirements applicable at the relevant time.

The technical documentation and supporting evidence required for the relevant requirements will be maintained, where necessary and in accordance with the applicable statutory provisions. This applies in particular to the technical documentation and the EU Declaration of Conformity in accordance with the applicable provisions of Regulation (EU) 2025/40.

This letter does not constitute any guarantee or agreement regarding the quality or characteristics of individual packaging with respect to compliance with the PPWR beyond the statutory requirements.

Only the applicable statutory requirements, as amended and in force at the relevant time, shall be authoritative. Should you have any questions regarding specific packaging or products, please do not hesitate to contact us.

Yours sincerely,

Oskar Lehmann GmbH & Co. KG

Jens Maier
on behalf of the company
